

BASIC NO BLUSH - "BAR TOP"

Table top - bar top resin

Only bar top - table top resin with bubble breaker

Only epoxy system designed specifically for table tops and bar tops

Longer pot life - about 25% slower for more work time and leveling

Easy 2:1 mix ratio (by volume)

VOC (solvents - 0% = no odor or fumes)

VOC Class: Waterproof

USES Formulated for table and bar top applications

NOTES - Re-coat 6 - 24 hour - full cure 5-7 days (like all epoxies) ---Mix

part A with Part B in a 2 - to mix ratio. Mix what you can apply or use in

15 - 20 minutes --- spread with brush, roller or squeegee --- apply no

thicker than 1/4 inch at a time ---- unless top-coated this epoxy (like all

epoxies) will yellow in UV sunlight and over time in all conditions - best

if applied over earth colored backgrounds that will mask any yellowing ---

warmer temperatures will shorten potlife - work time
